

ANNODATA UNIFIED COMMUNICATIONS AS A SERVICE

POWERED BY MITEL UCAAS PLATFORM

More and more businesses are looking to grow without incurring additional increases in real estate or human resource. Cloud communications can help businesses achieve these objectives through better collaboration and improved processes.

ANNODATA

Annodata is a dynamic agile business with over 30 years' experience helping business meet their strategic objectives. Our customer centric approach defines our simple model across all aspects of our business.

Technical experts, accredited to the highest level, deliver our established Managed Services business which is built from our service heritage. Annodata takes pride in being a principle provider of technology from within a range of market leading partners. At the forefront of these is our special relationship with Mitel.

UCaaS

UCaaS is a scalable IP communications service that enables organisations to dramatically reduce the capital investment, complexity and support costs associated with on premise solutions.

MiCloud Enterprise UCaaS is focused on enabling business agility through a comprehensive communications suite that combines IP telephony, Unified Communications, collaboration and contact centre into one fully managed service.

Key Features

- For organizations with 30 to 50,000 users
- Hundreds of call control features included
- Auto attendant, recorded announcements, unified messaging and visual voice mail
- Audio, video and web conferencing – enabling teamwork from anywhere and on any smart device
- Support for voice, email, fax, web chat, and social media interaction
- Leverage data centre investment in security and availability

Transform Your Business

Fully featured voice communications combined with a wide range of IP telephones enables MiCloud UCaaS to be tailored to any business. Mobile devices can be incorporated to streamline communications and reduce call costs. Staff can make better communication decisions using a corporate directory with presence information. Distributed teams can work together from any location using audio, video and web collaboration.

Managed Communications

MiCloud UCaaS is delivered from a secure data centre environment. The service leverages VMware® vCloud® technology to maximise availability. Your chosen partner will help you define requirements, manage implementation and provide a point of contact for ongoing support.

Choice of Deployment

Organisations can combine on-premise and cloud communications to optimise head office, branch office and mobile deployments. The use of common software and IP telephones enables organisations to protect their investment when migrating from on premise to cloud.

Your chosen partner will be able to advise on the best deployment option for your business.

OVERVIEW OF UCAAS

Overview

- For organisations with 30 to 50,000 users
- Improve productivity through better communication and team working
- Improve customer interaction
- Ideal for organisations with multiple offices and / or mobile workers
