

# IN A SEA OF SECURITY THREATS, STAY SAFE IN THE O<sub>2</sub> BUBBLE

Cyber thieves, hackers, the tactics they use are evolving all the time. O2 and Annodata understand this and how vital it is to keep your business secure online, giving your employees the flexibility to work from wherever they are. That's why we dive deep to evolve our solutions, keeping all your important stuff safe and protected.

O2 and Annodata have you covered. Don't watch your important data float away.

## GDPR

New GDPR regulations take data protection laws further than ever before, meaning there are sizeable fines for failure to be compliant. With many employees using their business devices for personal business, your data security is now even more important.

## Office 365

Great for keeping your people connected on the go. But brilliant for protecting their data with Microsoft's security systems. And O2's Microsoft Gold-certified experts are there to help too.

## Mobile Recording

Mobile recording gives greater control and transparency of your customer interactions, regardless of device or operating system. And yes, it's compliant with new GDPR regulations. But just as importantly, it keeps your data secure in the cloud.

## Box

Share documents and collaborate online with colleagues and customers, wherever they are or just keep your important documents safe in the cloud with secure back-up and file-level encryption.

## O2 Recycle

Getting rid of your old phone? What about the data that's on it? No problem, all recycled devices are securely wiped by O2's security partner Blancco, who are also first choice for defence, health and banking organisations. Your private data stays that way.

## Security and MDM from O2 and Annodata

Protection for your smartphones, tablets and even your PCs. O2 have a range of solutions to keep you secure and help you manage all your mobile devices. All from one place. MaaS360, Microsoft EMS, Microsoft Intune and McAfee Multi Access, O2 and Annodata have all the products to keep cyber thieves from bursting your bubble.
